Name :Rand Almasaeed: TASK #1

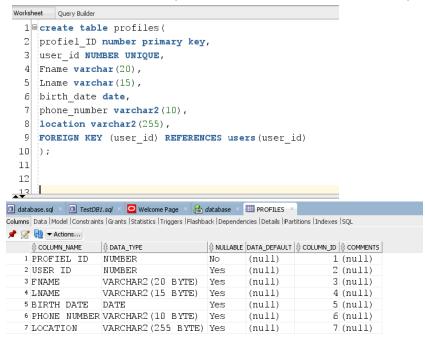

Email: randalmasaeed27@gmail.com

Design a database for a messenger system, The system contains many users that can send messages to each other, and each user has his own profile that contains information about him. This system has many services, and the users can use these services when they buy them, each user can buy more than one service.

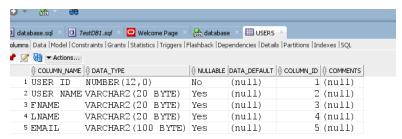

1- Draw the ER diagram or Schema diagram for the previous scenario.

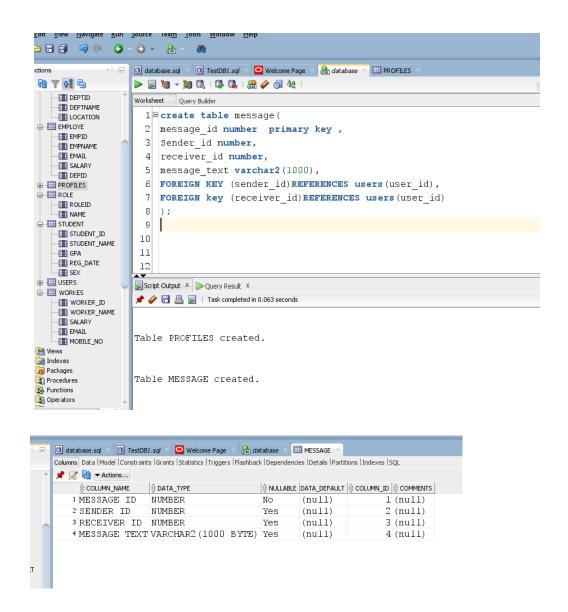

2. Create all the required tables for the system.

## users table:

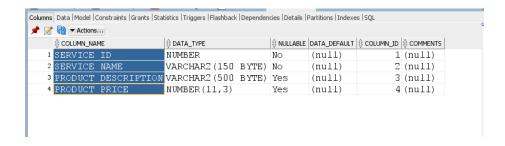

messages Table:

## Service table:

```
Worksheet Query Builder
 8 );
 9
10 create table service (
11 service_id number primary key ,
    service name varchar2(150) not null,
13
    product_description VARCHAR2 (500),
         product_price NUMBER(11, 3)
14
15
    );
16
17
18
19 );
Script Output × Duery Result ×
📌 🥢 🖥 🚇 📦 | Task completed in 0.038 seconds
Table MESSAGE created.
Table SERVICE created.
```

## **TABLE** payments:

```
Worksheet Query Builder
      1 □ CREATE TABLE payments (
           payment id NUMBER PRIMARY KEY,
      3
            user_id NUMBER,
            service id NUMBER,
ER
            amount paid NUMBER (12, 3),
      6
            payment date DATE DEFAULT SYSDATE,
      7
            payment_method VARCHAR2 (20),
            FOREIGN KEY (user_id) REFERENCES users (user_id),
      8
            FOREIGN KEY (service id) REFERENCES services (service id)
SCR:

```

4- Update 1 record from each table using DML commands.

```
neet Query Builder
 UPDATE users
 SET email = 'rand_hassan_updated@gmail.com'
 WHERE user id = 1;
 UPDATE profiles
 SET phone number = '0785492688'
 WHERE profile id = 1;
 UPDATE messages
 SET message_text = 'welcome!'
 WHERE message_id =3;
 UPDATE services
 SET service_price =5.5;
 WHERE service_id = 2;
 UPDATE user services
 SET service id = 2
 WHERE user id = 1 AND service id = 1;
 UPDATE payments
 SET amount_paid = 10.95
 WHERE payment_id =2;
ript Output × Query Result ×
```

5. Delete 1 record from each table using DML commands.:

```
DELETE FROM users

WHERE user_id = 3;

DELETE FROM profiles

WHERE profile_id = 3;

DELETE FROM messages

WHERE message_id = 2;

DELETE FROM services

WHERE service_id = 3;

DELETE FROM payments

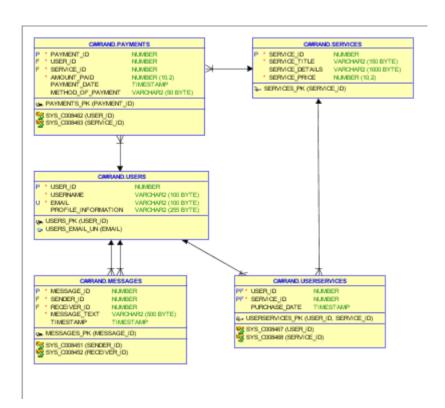

WHERE payment_id = 2;
```

6- Modify 1 of the table's names using DDL commands.

7- Modify 2 columns' names with their datatypes using DDL commands.

```
orksheet Query Builder
  1 ALTER TABLE users
    RENAME COLUMN email TO user_email;
  4 ALTER TABLE users
    MODIFY (user_email VARCHAR2(110));
  5
